Projects

NewsGlance — AI-Powered News Platform Live Backend Frontend

Backend - *Node, TypeScript, PostgreSQL, Prisma, Redis, Docker, AWS (EC2, RDS, S3, Bedrock, Polly, CloudFront)*
Frontend - Next.js 15, TypeScript, Redux Toolkit, TanStack Query, Tailwind CSS, Framer Motion, Shadcn UI

- Implemented **Redis-first caching** across all news feeds (home, category, country, search) — Guardian API called only on cache miss, eliminating redundant external calls.
- Deployed REST API on **AWS EC2** behind **CloudFront** (HTTPS), **Dockerised** with Compose; **Prisma ORM** managing a relational **PostgreSQL** schema across 6+ models.
- Integrated **AWS Bedrock** (primary) + **Google Gemini** (fallback) for AI article summarisation and **AWS Polly** for TTS audio, stored on **S3** and streamed via a custom player.
- Wired **Cashfree** payment gateway with order creation and verification; OTP-gated auth with **Google OAuth2**, **JWT** sessions, Redis blacklisting, and **Argon2** hashing.

NestFinder — Property Listing Platform Live Backend Frontend

Tech Stack - *Node.js, Express.js, MongoDB, Supabase, Next.js, TypeScript, Redux, Tailwind CSS, Framer Motion*

- Built scalable **REST APIs** using OOP-structured **Express + TypeScript** with a robust middleware pipeline for auth, request validation, and error handling; **JWT-based auth** and efficient **MongoDB** queries via Mongoose.
- Developed a responsive, animated property listing UI with **dark mode**, **Framer Motion** transitions, property filtering, and real-time data updates.
